Our Environment!

Topic

- It is really important to look after our world and environment. Create a poster to encourage people to think about how they can help. You might want to make a recycling poster, a poster about littering or a poster about litter in the sea.
- Go out and explore our local area. You could walk down to the beach, go to Alexandra Park or go to Hastings Country Park. What can you see? What plants or flowers can you find? What animals are there? What is your favourite thing about our local environment?
- Learn about alternative energy sources using this online lesson <https://www.bbc.co.uk/bitesize/articles/zr9ckmn>

Science

Take part in this online lesson about adaptation <https://www.bbc.co.uk/bitesize/articles/zjf3rj6> Once you have completed it, think about how global warming and climate change might affect animals. How might they need to adapt in the future?

PE

- Keep fit using these ideas:
- build an obstacle course for you and your family
 - Joe Wicks 9am every morning on YouTube
 - Cosmic Yoga on YouTube
 - Look on Facebook for Mr Henham's challenges

Art

- Using some of your recycling, create a junk model. This could be of anything you like!
 - Draw or make the Earth
 - Hastings is our local environment - draw or paint a picture of our town.
- Make a collage from recyclable materials that will promote the advantages of recycling.
- Draw a detailed picture of something in our local environment. It could be a flower, a building you like or an insect you find.

Computing

Test your knowledge of energy sources on Purple Mash using:
https://www.purplemash.com/#app/games/2diy/renewable_nonrenewable

Writing

Look at Oak Academy's website each day for your English lesson. Make sure you have a pencil and some paper ready!

<https://www.thenational.academy/online-classroom>

Maths

Go to Oak Academy's website for your daily Maths lesson. Just use the subjects tab at the top to find your year group and turn your Maths brains on!

Consider this...

Should we be worried about the effects of global warming to the planet? Is it something we can ignore? Is it something for future generations to worry about more than us? Is it important for us to do something now to prevent catastrophe in the future?
